

Uninstallation of SysTools Software from Mac OS

Follow the steps sequentially to uninstall SysTools Software from Mac OS completely.

From the **Devices** section, select IMAC HD, or you can simply find this on your **Desktop** as well.

Next, move to the Library folder and open Application Support folder from there.

A list of SysTools software will then, appear in front of you. Double click on the software that you want to uninstall completely, i.e. **SysTools Software**.

Lastly, right click on **SysTools Software** and then click on **Uninstall >> Yes**. The software will be uninstalled.

Once the un-installation is completed, you will receive a notification in your web browser, which says "**Feedback**". Please share your valuable feedback to us.
